Brian,

Thanks for the update. Do you mean that samples will not be collected from the ICWW next week or is that still planned for the week of the 9th?

Thanks,
Clare

Clare

The contractor will start work on Mon Sep 9 and I plan to be there through Friday Sep 13. The contractor is planning on working over the 1st weekend and until the middle of the next week installing monitor wells. The contractor will not be collecting background samples for wetlands due to issues with access at this time. I will not be on site the week of Sep 16th and will return to the site the week of Sep 23 when the contractor is collecting samples from the new monitor wells. After EPA receives the results of the sampling event, EPA will start planning the second sampling event for AOC-1 and background samples for wetlands.

Thanks
